

InvisiSign Can Aisle Violator

Bring attention to your product at just the right moment with this revolutionary, technologically advanced, LED lit optical Can Aisle Violator from Design Phase, Inc. Your brand message is illuminated and projected on a flexible ultra-thin optical film. Invisible at first, the message is activated and flashes when shoppers come within 10 feet, capturing their attention right at the point of purchase.

The InvisiSign Can Aisle Violator offers a truly unique and creative approach to bringing attention to your project. Versatile in configuration and graphical applications, the Can Aisle Violator applies the latest technology in LED lighting and signage to change the way we see products.

- Flexible super thin optical film offers unlimited possibilities for applications including distillery, jewelry, apparel, accessories, toys.
- Customized messages feature four-color graphics and copy provide a strong messaging opportunity.
- Easy installation and set up.

Printability

- Resolution 300 dpi (minimum).
- Gray scaled images will have whites and light grays appear glowing in light, while the blacks and dark grays will be transparent.
- CMYK print is included.

Dimensions and Power

- 10" x 5" round shaped thin transparent film.
- 8" base which holds batteries, control circuitry, and proprietary lighting system.
- Device is power by 3 D cell batteries.
